The cybersecurity labor gap now stands at 4M+ open jobs. Intezer has raised \$33M for AI tools to plug it

Greenlite, founded by an ex-Gopuff exec, automates construction permitting

The cybersecurity labor gap now stands at 4M+ open jobs. Intezer has raised \$33M for AI tools to plug it

By admin

When it comes to talent shortages in tech, cybersecurity is one of the biggest and most urgent that needs filling. Malicious attacks are on the rise, and the techniques being used to worm into networks are also scaling up. Yet the World Economic Forum recently found that there are 4 million positions unfilled globally — a figure it projects will balloon to 85 million in the next five years.
